What's on my Pi 4

A Raspberry Pi 4 is used on my home system to provide some essential services. This book contains some details and help files.

- Pi 4 Setup

Pi 4 Setup

This is a Raspberry Pi 4 with only 8 gig or RAM.

This Pi 4 is NOT available to the outside world. Access to it is via WireGuard, which is already installed on the Pi.

The Pi is manly used to allow local access from the outside world in order to perform admin duties in the yunohost server..
